

28.0 LEGO SERVICE PACKS & INDIVIDUAL PART SALES (1951-79).

The difference between spare parts packs and service packs is that spare parts are found in boxes, and service packs are found in small plastic bags. There are some LEGO Train elements that were spare parts from 1966-76 (in boxes), and switched over to service packs in 1977. These are mainly in continental Europe. In Britain and Australia, the service packs and individual sales were always handled by mail order as service packs.

28.1 Denmark - Individual Part Sales (1951-65).

Automatic Binding Bricks, the name used for early LEGO bricks from 1949-53, were only sold in sets #700/1 thru #700/6. But starting circa 1950 TLG started selling LEGO bricks as individual parts as well as spare parts packs. This was for Denmark only. The first individual parts for sale were slotted bricks in sizes 1x2, 2x2, 2x3 and 2x4 and 10x20 baseplates. The first windows and doors (which were the very thin windows that fit into the slotted bricks) were also available as individual parts. Then in 1954 other new parts became available. LEGO beams in 4 sizes, as well as the 4x4 corner brick were available as individual parts. Also in 1954 a new set of tall classic windows and doors were available as individual parts.

Kjeld Kirk Kristiansen, grandson of LEGO Company founder Ole Kirk Christiansen is seen on this 1953-55 LEGO set box top getting bricks from the same box used by LEGO retailers for individual parts sales. Bricks and windows/doors were simply dumped into a large partitioned wooden box, for Danish children to scavenge through to find the parts they wished to purchase.

During the early 1950's, Automatic Binding Bricks were available in many colors (but available in few sizes) for Danish children to purchase individually from their Danish LEGO retailer.

Individual parts were packaged in small long cardboard boxes. These boxes were dumped into the large wooden retailer box. When children wanted to buy individual LEGO elements they dug through the big box for the parts they were interested in.

These individual part sales must have been a popular item with Danish LEGO retailers because the practice continued until 1965, even while other countries coming online to LEGO sales mainly sold spare parts as parts pack boxes. When Sweden started selling Automatic Binding Bricks in Sweden in 1950, and Norway in 1953, the individual parts sales were not included in those countries (with the exception of large 10x20 baseplates, and 2x12 and 2x14 beams).

2x10 red bricks, known as #700/20, in the box TLG sold to LEGO retailers in Denmark.

The bricks in Danish retailer boxes were available in many colors. Some colors were not available in regular LEGO sets, so therefore some brick colors were not found outside of Denmark.

Part of a 1954 Danish catalog that shows all the LEGO elements which were available in 1954. All of these parts except the 10x20 baseplate and 1x1 round and square bricks could be found as individual parts sales in Danish retailer boxes.

The individual LEGO parts sales in Denmark originated with the slotted bricks and windows/doors with “wings” used with the slotted bricks. When the Town Plan line came into production in 1955, all the new specialty parts (trees/bushes, road signs, Esso Service accessories, etc.) were only sold in spare parts packs, not as individual items. But in Denmark only, individual bricks larger than 1x2 or larger bricks, were only available as individual sales from 1955-65 (except for 1x6 and 1x8 bricks).

The windows/doors that were used with the slotted bricks, were available as parts packs #700B (1953) and #700C (1954) in Denmark and Norway, or as individual parts in Denmark only. The only Lego parts that were sold as individual items in Norway and Sweden (starting in 1955) was the #700/24 2x12 bricks, the #700/28 2x14 bricks, and the #700E 10x20 baseplates.

1951-58 Danish Individual LEGO Parts - Numbering System

1951-56 for Slotted Hollow Bottom Bricks/1956-58 for Hollow Bottom Bricks

Part Number	Years Sold	Part Description
#700 B/1	1953-55	Individual 1x4x2 windows (style without glass)

#700/20	1954-58	Retailer refill box of 25 2x10 slotted bricks
#700/24	1954-56	Individual 2x12 slotted bricks
#700/24	1954-56	Retailer refill box of 25 2x12 slotted bricks
#700/28	1954-56	Individual 2x14 slotted bricks
#700/28	1954-56	Retailer refill box of 25 2x14 slotted bricks

Starting in 1958, Denmark switched to a new numbering system for the new “tube bottom” bricks. From 1958 until 1965 Denmark continued to sell bricks as individual parts available from the retailer. Other continental European countries sold bricks only in spare parts packs. But Denmark sold the larger bricks as individual parts. Danish retailer individual parts sales were ended in 1965.

A #221 box of 200 1x2 yellow bricks was sold by TLG to Danish retailers for individual parts sales from 1958-65. Individual Danish parts sales ended in 1965.

1958-65 Danish Individual LEGO Parts - Numbering System

Part/Box Number	Part/Box Description	Number of Parts

28.2 Continental Europe - Retailer Window/Door Boxes (1957-66).

28.2.1 #214 1-10 Continental Europe Retailer Window/Door Boxes (1957-65).

In 1957 TLG started selling classic style LEGO windows and doors from a retailer box that was different from the individual brick sales of Denmark from 1953-65. The LEGO windows/doors retailer box was known as #214 1-10. From 1957-60 this attractive box looked just like the boxes for the #700/1-#700/6 basic sets being sold at that time. From 1961-65 the #214 1-10 box had a different design with all 9 window and 1 door type shown on the box top.

The early 1957-58 #214 1-10 Retailer Windows/Doors box. These boxes only came in 3 language versions, German, Danish and Swedish/Norwegian.

1957-65 LEGO Retailers #214 1-10 Windows/Doors Individual Parts/Boxes

Country	Years	#214 1-10 Box Top Written Description*
Denmark:	1957-60	“LEGO Mursten” and “System i leg”
Norway/Sweden	1957-58	“LEGO Mursten” and “System i lek”
Germany	1957-58	“LEGO Bausteine” and “System im Spiel”
Continental Europe	1958-60	“LEGO System” (Town Plan Scene) **
Continental Europe	1961-65	“LEGO System” (Windows/Door Scene)

* - All retailer boxes with local language names have the Town Plan scene.

** - In 1958 the Retailer windows/doors boxes still had the local language(s) writing on the sides of the box.

A box of #214/1 large white 1x6x3 Panorama windows ready for installation in a Retailer Windows/Doors box.

The larger windows and doors came in long thin cardboard brown boxes that could be inserted into part of the retailer box. The 1x1x1, 1x1x2 and 1x2x1 small windows came in small square boxes. When you removed the top to these cardboard boxes of the larger windows and doors, the parts were neatly stacked in long rows with only their studded top showing. All the larger windows were stored in a single row in the retailer box. The 1x2x2 windows and 1x2x3 doors were stored in a double row. The 3 smallest windows (1x1x1, 1x2x1 and 1x1x2) were loosely stored in small square boxes. A full #214 1-10 box could hold 375 windows. Refills could be reordered by individual #214 numbers or an entire set of refills (without the large retailer box) would be #214 S.

The inside of a full #214 1-10 Retailer Windows & Doors box with both red and white windows. Some retailers kept a separate box for each window color, others used the same box for both colors.

The 1958-60 Retailer Windows & Doors Box Top. Around the sides of the box were written "LEGO System in Play" in many European languages.

1957-65 LEGO Retailers Windows/Doors Individual Parts/Boxes

The 1961-65 #214 1-10 Windows/Doors retailer box top. This same design was used on the #461 retailer box that replaced it in 1966.

28.2.2 #451-#461 Continental Europe Retailer Window/Door Boxes (1966-67).

The #214 series of window/door part and set numbers were retired in 1965. But the parts and retailer window/door boxes were still available in 1966-67, but under a new numbers. The numbers are #451-#460 and they match #214 1-10 respectively. A new retailer box was also produced, and is known as #461.

The larger windows and doors came in long thin cardboard brown boxes that could be inserted into part of the retailer box. The 1x1x1, 1x1x2 and 1x2x1 small windows came in small square boxes. When you removed the top to these cardboard boxes of the larger windows and doors, the parts were neatly stacked in long rows with only their studded top showing.

All the larger windows were stored in a single row in the retailer box. The 1x2x2 windows and 1x2x3 doors were stored in a double row. The 3 smallest windows (1x1x1, 1x2x1 and 1x1x2) were loosely stored in small square boxes, which were also inserted into the large retailer box when the top was removed. Each of these refill boxes had a star stamped on the end of the box in the color of the contents of the box. A full #461 retailer box could hold 375 windows. Refills could be reordered by individual #451-#460 numbers.

The new windows/doors retailer box did not last for more than one year. In 1967 all of continental Europe only sold windows/doors in a box of 10 in parts pack #414 (one of each), and the windows/doors retailer boxes were permanently discontinued. However, retailers kept their old retailer boxes on hand until the individual windows/doors were finally sold. Some small town retailers, due to slow sales, managed to keep their windows/doors boxes available on the store shelves for over 20 years.

After the end of the Danish individual parts sales in 1965, and the continental European retailer windows and door boxes in 1967, there were no more individual parts sales. But starting in 1970 Britain and Australia started (thru British Lego Ltd.) Mail-Order sales of Lego parts. This was followed by service pack type part sales in continental Europe from late 1977-80. Some countries (such as Germany) sold the parts as individual or grouped parts. Other countries, such as Italy and the Netherlands, sold items only as Mail-Order.

28.3 Britain/Australia - Mail Order Service Packs (1970-76).

British LEGO Ltd. was the licensee that sold LEGO in Britain through their Wrexham, North Wales headquarters. Unlike continental Europe, individual part LEGO retailer boxes were never used in Britain. So by the early 1970's when a need arose for individual parts, it was decided to sell them mail order only. By 1975, there were 36 LEGO parts/part groups sold in this manner. It also appears that many of these same British spare parts were available in Australia.

1970-76 UK/AUS LEGO Mail Order Spare Parts for Train/Town Systems

Parts Number	Parts Description	Year Introduced
#S1	Plate w/ Steering Control Tongue	1970
#S2	Steering Column for #S1	1970

#S33	Wooden Storage Box with 2 Tier Plastic Trays	1975

lego spares
 Available only from British Lego Ltd.
 Wrexham, N. Wales

As retailers are unable to carry full stocks of spare parts, these items are offered as a direct service to Lego collectors. Prices include post and packaging and apply to U.K. only. Please send crossed P.O. with order to Spares Service Dept., British Lego Ltd., Wrexham, N. Wales.

S1	Baseplate with steering control tongue for vehicles 331/332/333/335/336/337 (state which)	9p	S10	Motor unit only, without wheels, etc.	£1.65
S2	Steering column (standard for all vehicles)	9p	S11	Battery case only	72p
S3	Pair of 4-stud axle bricks, wheels and tyres for Legoland cars	14p	S12	Spare connector lead for all motor and lighting bricks	11p each
S4	Set of 4 small tyres for 1-stud wheels	9p set	S13	Building plate to fit over motor	9p
S5	Set of 4 standard tyres for 4-stud wheels	9p set	S14	Spare bulb for 8-stud lighting brick No. 445A	9p
S6	Set of 4 large tyres for 12-stud wheels	11p set	S15	Spare 4-stud sealed lighting brick No. 995	19p
S7	Pair of caterpillar tracks for 4-stud wheels	11 pr.	S16	Two hinges (red or grey)	14p pr.
S8	a. Set of 4 flanged drive wheels, rubber rim, and notched axles for sealed motor b. Set of 4 flanged drive wheels, rubber rim, and un-notched axles for unsealed motor c. Set of 4 rubber rims only for flanged drive wheels	14p set 14p set 6p set	S17	Level crossing with barriers (as in 119 train set)	42p
S8t	Set of 4 stud wheels with tyres and notched axles for sealed motor only	14p set	S18	Pole reverser (clips under battery box) for automatic reversing of trains	44p
S9	Set of 4 bushes to hold wheels in motor, for unsealed motors only	14p set	S19	Pair of T.V. aerials	9p

Printed by Mohn Gordon in West Germany.

British Mail-Order spare parts as seen in the 1972 British LEGO Catalog.

28.4 Continental Europe/Britain/Australia - Service Packs (1977-80).

Although spare train parts continued to be sold thru mail order in Britain and Australia in the late 1970's, in several continental European countries they started being sold directly from the LEGO retailer. As the LEGO train system got more complex in the 1970's, TLG decided to sell individual parts in a similar way that they sold individual windows and doors from retailer boxes in the late 1950's and early 1960's. That was by way of a retailer box of spare parts.

These retailer boxes were wooden boxes with about 20 compartments for the different spare parts. These boxes were (as was the case with the window/door retailer boxes) only used in continental Europe. The LEGO retailer would have the box either behind the counter, or underneath the LEGO rack. Most of the parts in these boxes were related to trains, but some Technic parts were included, as were some sloped bricks, round bricks, construction equipment (steam shovel and bulldozer parts), airplane/helicopter parts, hinges, ship keels, car/truck tires and lighting bricks.

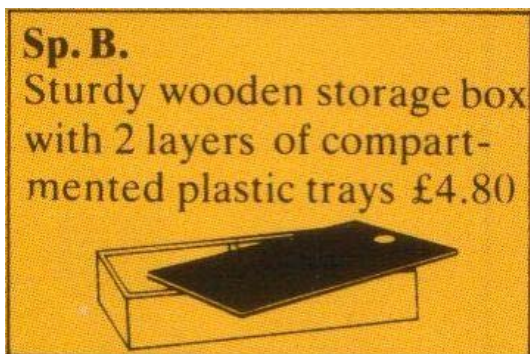

This box is a mock up of a German Retailer Train/Spare Parts Box of circa 1978-82.

The sale of items from these retailer boxes started about late 1977. Originally the parts were not packaged, but by 1980 they were sold in plastic flat packs with a 4 digit part number. The 1977-80 individual parts had 1-2 digit numbers. By the early 1980's these same parts were produced in a clear plastic flat pack (with a hole for hanging in a display rack). These early 1980's 4 digit pack numbers were #1101 thru #12xx. Some continental European countries such as Italy and the Netherlands only sold spare parts thru mail order, similar to Britain and Australia.

Many times the retailer themselves put these loose parts into small plastic bags, labeled them, and stored them in the wooden retailer boxes. This was probably to reduce theft of small individual parts.

In some continental European countries, such as Italy and the Netherlands, there were no loose part sales. All spare parts were only available thru Mail Order.

One of the more unusual items found in the British catalog service pack listings in the 1970's was this large empty wooden box with 2 levels of plastic trays.

British Mail Order service pack list from the 1977 Catalog

De LEGO Service

Wanneer je eens enkele speciale onderdelen wilt vervangen die de winkelier niet in voorraad heeft, kan de LEGO Service hulp bieden. Pakjes met de meest gevraagde elementen zie je hier onder. Mocht je toch iets anders zoeken, vraag dan de meer uitgebreide prijslijst van onderdelen aan.

Nieuwe elementen zijn in het introductiejaar helaas

niet leverbaar en complete dozen kun je alleen bij de winkelier kopen.

Gebruik altijd het formulier, hiernaast. Ook voor een folder e.d.. Sluit wel een geldig en goed ingevuld betaalmiddel bij. Kontant geld mag alleen aangetekend worden verzonden.

Toezending volgt per post binnen ca. 2 weken, zonder verdere kosten (binnen Nederland).

28.5 USA - Mail Order Service Packs (1980-84).

From 1973 until 1979 there were no spare parts packs available in the USA. The first spare parts came out in 1980 and were mail-order service packs, similar to those spare parts sales in continental Europe. Unlike USA, continental Europe, Britain and Australia, Canada did not sell service packs in the 1970's or early 1980's.

USA LEGO Mail Order Service Packs (1980-84).

Parts Number	Parts Description	Year Introduced
#1	25 Chain Links	1980
#1	50 Bulldozer Chain Links	1982
#2	Digger Bucket Assembly	1980
#2	2 Large Tires & Hubs	1982
#3	Doors & Fences	1980
#4	Propellers & Wheels	1980
#5	Hinges	1980
#6	LEGO Motor Wires	1980
#7	4.5 V Battery Box	1980
#8	Replacement 4.5 V Motor	1980
#9	Trees & Flowers	1980
