Cordially invites practising physicians only to

Managing Residual Risk in Type II Diabetes & CKD Focus on Albuminuria

Learning Objectives

- Assess residual cardiovascular & renal risk in patients with CKD and Type 2 Diabetes with current therapies.
- Understand the role of albuminuria as an independent cardio-renal risk factor for patients with T2D & CKD.
- Understand the role of novel non-steroidal MRA treatment for patients with T2D & CKD above and beyond current therapies.
- Implement current guidelines and the pillar approach for the treatment of CKD in patients with T2D

Speaker

Dr. Daniel Schwartz MD FRCPC
Nephrologist, Royal Columbian Hospital
UBC Assistant Clinical Professor
Medical lead, Fraser Health Home Dialysis Program

Thursday December 5, 2024

Reception: 6:00
