

The Washington's Crossing Flyers Association has been part of the Washington Crossing State Park going on 25 years. Our membership is a sizeable group from all walks of life. Our members are unified with the love of building, flying and maintaining our fleet of radio-controlled aircraft. Fixed wing, rotary wing, scale aircraft and even flying witches all take a turn in the skies. Just about every nice day, someone will be flying something during the year.

As a volunteer organization, we participate in park events, maintaining traffic flow and parking of the many visitors. Our club provides demonstrations and displays for communities in the area. Visitors are invited to our location on Church Road in Titusville.
